EPA draft BERA executive summary_WW RLSO for informal discussion with EPA 28Jan2013.docx

BERA ecol sigif flow chart_28Jan2013.docx

Hi Burt. Thanks again to you and Chip for coming over and staying so late last Friday. As agreed we've editing BERA Executive Summary for consistency with the ecological significance discussions and agreements made during last Friday's meeting. We've also edited the write-up about clusters of benthic toxicity (p. 17) to make it consistent with the BERA. Please take a look (the ecological significance section starts on p. 22) and confirm that we accurately captured all the agreements. In order to stay on schedule we need your response by this Friday. Unless we hear otherwise by COB Friday, we'll proceed with modifying the BERA in accordance with this RLSO version of the Exec Summary. Any additional time needed to resolve the Exec Summary will likely result in an impact to the April 1st submittal deadline. Let me know if you have any questions. Thanks again, John
